Research Overview:							
<p>We are developing an overall theory of human face recognition, and comparing human recognition abilities to those of current computer face matching systems. We are actively investigating identification of faces from video and CCTV images as well as from static photographs. We are also exploring ways to improve recall of face images by human witnesses. Some of this work is conducted in collaboration with the University of Glasgow.</p>							
Contact: Vicki Bruce, Peter Hancock or Mike Burton				Tel: as above, or 0141 330 4060			
Email: as above, or P.J.B.Hancock@stir.ac.uk, mike@psy.gla.ac.uk							
Research Project overviews:							
<p>Researcher(s): Zoe Henderson , Vicki Bruce and Mike Burton email:zoe.henderson@stir.ac.uk details: Experimental studies on human accuracy and speed of identifying faces in different conditions of viewpoint, lighting, animation. Effects of familiarity and familiarisation. Current funding from EPSRC (with UMIST) plus associated PhD project funded by University of Stirling.</p>							
<p>Researcher(s): Karen Lander and Vicki Bruce email:karen.lander@stir.ac.uk details: Effects of movement on the recognition of faces. Current funding from ESRC</p>							
<p>Researcher(s): Charlie Frowd and Peter Hancock email: Charlie Frowd and P.J.B.Hancock@stir.ac.uk details: Developing alternative face recall systems using genetic algorithms and holistic face images. Current funding from EPSRC</p>
